Product Description

The NL718 Sedum Blanket consists of a carrier made up of a filter fabric on one side and a polymer loop network on the other. The carrier is offset by 100mm, to create an overlap on both sides of the roll. Engineered growing medium and specially selected seeds and cuttings are then distributed evenly over the three-dimensional polymer coil loop network, to establish the pre-cultivated vegetation mat. NL718 Sedum Blankets are guaranteed to have a minimum of 80% vegetation coverage at the time of shipping.

Technical Data

▪ Thickness (mm)	20.0
▪ Dry weight (kg/m^2)	17.2
▪ Saturated weight (kg/m^2)	29.7
▪ Stormwater retention (L/m^2)	12.5

Packaging Properties

▪ Length (m)	2.0
▪ Width (m)	1.1
▪ Area (m^2)	2.0
▪ Diameter of rolled vegetation (m)	0.2
▪ Length of rolled vegetation (m)	1.1
▪ Sat. weight of rolled vegetation (kg)	59.4

Recommended Application

- Abut tightly all end and side seams.
- Start next row with a half roll so the end joints stagger between rows.
- Cut and fit to the edge of the non-vegetated border zone along the roof edge and around penetrations.
- Saturate sedum mats thoroughly.
- Sedum is a low traffic plant. Avoid damage by excessive walking and storing items on vegetation.

Plant list – Standard Mix

Sedum acre	Sedum kamtschaticum	Sedum spurium 'Coccineum'
Sedum album	Sedum pulchellum	Sedum stenopetalum
Sedum spurium 'Summer Glory'	Sedum reflexum (rupestre)	Sedum stoloniferum
Sedum floriferum	Sedum ellacombianum	Sedum sexangulare

*Plant list is subject to change based on availability of seeds/cuttings
