

## Product Description

NL300 is a three-dimensional, light and flexible composite matting made up of a drainage core of looped nylon filaments. NL300 Drainage Mat has high drainage capacity made possible by its open polymer network. The product is manufactured in long rolls effectively reducing installation costs by minimizing butt seams and eliminating interlocking.

## Technical Data

### Mechanical Properties

▪ Material	Polymer
▪ Thickness (mm)	17
▪ Weight (g/m <sup>2</sup> )	340
▪ Longitudinal Tensile strength (kN/m)	5
▪ Transversal Tensile strength (kN/m)	4
▪ Recycled Content (%)	40

### Packaging Properties

▪ Length (m)	60
▪ Width (m)	1
▪ Area (m <sup>2</sup> )	60
▪ Color	black
▪ Diameter of roll (m)	0.50
▪ Length of roll (m)	1.02

## Recommended Application

- Install NL300 with either side facing down.
- Start the next row with a slightly shorter roll so the end joints stagger between adjacent rows.
- Abut rows tightly.
- Install over entire vegetated roof surface.
- Cut and fit along vegetated roof edge and around penetrations.
- Cover immediately to avoid damage from UV radiation or displacement by wind.
